Yoga & Health Clubs

Yoga

Yoga is a system of exercises for physical and mental well being. It combines stylised poses with deep breathing and meditation. The term Yoga is itself derived from a Sanskrit word meaning to join together. The ultimate aim in Yoga is to unite the human soul with the universal spirit.

Yoga was developed about five thousand years ago. The first written description was found in "Yoga Sutras" attributed to Patanjali. According to Patanjali, within the human body there are channels called Nadi and centres called Chakra. If these channels and centres are tapped, energy hidden in the body can be released.

Diseases such as Asthma, Kidney problems, eye, stomach, ortho, etc. are cured by Yoga.
